Executive Summary

A Message on Responsible Growth

In 2024, Bank of America demonstrated that being a responsible company and a successful business are not only compatible — they are mutually reinforcing.

Our Environmental score reached 94 out of 100, placing us in the 99th percentile of global banking peers. We have operated on 100% renewable electricity since 2019, achieved a 96.5% reduction in greenhouse gas emissions versus our 2010 baseline, and deployed \$860 billion toward our \$1.5 trillion sustainable finance goal — all ahead of schedule.

Our 213,000 teammates — 52% of whom are women — continue to be our greatest asset. We invested over \$1.1 billion in training and development, raised our U.S. minimum wage to \$23 per hour (with a commitment to reach \$25 by 2025), and invested \$380 million in our communities.

Responsible Growth is not a slogan. It is the discipline with which we run this company every day — for our clients, our shareholders, our teammates, and the communities we serve.

OUR FOUR PILLARS OF RESPONSIBLE GROWTH

 Environmental Stewardship Net zero operations by 2050 · Carbon neutral since 2019	 Social Responsibility Diverse workforce · Pay equity · Community investment
 Strong Governance 92% board independence · ESG-linked executive pay	 Sustainable Finance \$1.5T goal · \$860B deployed · Green bonds issued

Peer Comparison — Banking Sector 2024

Company	MSCI Rating	CDP	Overall ESG	Env. Score	Renewable %	Women Workforce
Bank of America ★	AA	A	76	94	100%	52%
Morgan Stanley	AA	A	74	89	83%	45%
Citigroup	A	A-	70	81	47%	48%
JPMorgan Chase	A	A-	68	75	35%	49%
Goldman Sachs	A	B	65	72	61%	42%
Wells Fargo	BBB	B	61	68	42%	51%
Industry Average	BBB	C	58	61	47%	47%

Position: Bank of America ranks #1 among major US banks on Environmental score (94) and Renewable Energy adoption (100%). Governance remains an area for improvement at 49/100, primarily due to executive pay structure complexity and ongoing shareholder proposals.

ENVIRONMENTAL

Climate & GHG Emissions

96.5%

GHG Reduction vs 2010 Baseline
Total emissions dropped from 1,785,000 MT CO₂e in 2010 to just 61,800 MT CO₂e in 2024 — exceeding the 75% reduction target set for 2030. Carbon neutral achieved since 2019.

Scope 1 & 2 Breakdown (2024)

Scope	Source	MT CO ₂ e
Scope 1	Company vehicles	32,000
Scope 1	On-site fuel combustion	18,000
Scope 1	Backup generators	8,000

2015	980,000	45.1%
2019	195,000	89.1%
2021	88,000	95.1%
2022	74,000	95.8%
2023	66,000	96.3%
2024	61,800	96.5%
2030 Target	446,354	75% (TARGET — exceeded)
2050 Target	0	Net Zero

Monthly GHG Emissions 2024 (MT CO₂e)

Total 2024: 61,800 MT CO₂e · Annual trend shows seasonal pattern with summer peaks and Q4 decline

ENVIRONMENTAL

Energy Consumption & Renewable Transition

100%

Renewable Electricity Since 2019

3.48 million MWh consumed annually — fully sourced from wind, solar, and hydropower via RECs and Power Purchase Agreements (PPAs). Energy intensity: 16.3 MWh per FTE.

Energy by Facility Type (2024)

Facility	MWh	Source	Renewable
Global Office Operations	1,850,000	Wind RECs	100%
Data Centers	820,000	Solar PPA	100%
Retail Branches	610,000	Grid + RECs	100%
International Ops	200,000	Local RECs	100%
Total	3,480,000		100%

REC & PPA Portfolio

Type	MWh	Region
Wind Power RECs	1,600,000	Texas, Oklahoma
Solar PPAs	820,000	NC, Arizona
Hydropower RECs	640,000	Pacific NW
Other Renewable	420,000	Various (Green-e certified)

Energy Trend (2019–2024)

Year	Total MWh	Intensity	Renewable
2019	4,120,000	18.9/FTE	100%
2020	3,650,000	17.4/FTE	100%
2021	3,520,000	16.8/FTE	100%
2022	3,495,000	16.6/FTE	100%
2023	3,490,000	16.4/FTE	100%
2024	3,480,000	16.3/FTE	100%

Energy Savings vs 2019: By 2024, BofA reduced absolute energy consumption by 640,000 MWh (~15.5%) from 2019 levels, generating an estimated **\$134M** in annual energy cost savings.

Key Renewable Milestones

✓ 2019 — First US bank to achieve 100% renewable electricity

✓ 2022 — Solar PPA expansion: +250,000 MWh capacity

✓ 2024 — Energy intensity reduced 14% vs 2019

🎯 2030 — Target: further 20% intensity reduction
